

CATASTROPHIC BLEEDING CPD course - Half day

This is an excellent course designed for First Aiders who are involved in high-risk working environments. This 3-hour course will provide learners with guidance on catastrophic bleeding control, including dealing with the inherent dangers associated with the use of tourniquets and haemostatic dressings whilst administering first aid in a high-risk working environment.

Learners must hold a valid First Aid at Work or Emergency First Aid at Work certificate in order to attend the course.

This course can be delivered in combination with First Aid at Work.

This course is suitable for Forest Schools and High Risk Environment (e.g. Factories, Construction).

SYLLABUS

A range of subjects is covered including:

- Equipment
- Primary survey
- Catastrophic bleeding
